HTML EDIT TABLE CHEAT SHEET

First Some Rules for Beginners. These rules are for beginners to avoid any errors. They are not steadfast rules since advanced HTML Coders may have much more knowledge to create any type of table they want. However, for our purposes consider them RULES 😊

1. Each table must have the same columns in each row. You may not have two columns in the first row and four in the second row without closing the table and creating a new table.
2. Each Table must Start with a Start Table - `<table border="0" cellspacing="2" cellpadding="3">`
3. After starting a table, you must start the table body - `<tbody>`
4. Each Body must end - `</tbody>`
5. Each Table must end - `</Table>`
6. Each row must start - `<tr>`
7. Each Row must End - `</tr>`
8. Each Column must start - `<td>`
9. Each Column must end - `</td>`

SAMPLE ONE TWO COLUMNS AND FIVE ROWS

SAMPLE TWO FOUR COLUMNS AND ONE ROW

Issue Type: Select Issue

Reported By: Select Reported By

Criteria: Select Criteria

Classification: Select Classification

Location: Select Location

Product Code: Ncr Process: All | Select Product Co

Show Archived: ☐

Search In: All | | Submit

Region: All

```
<table border="0" cellspacing="2" cellpadding="3">
  <tbody>
    <tr>
      <td> Issue Type: </td>
      <td>[[filter_57_fk_issue_type:477]] </td>
    </tr>
    <tr>
